HERITAGE CHARACTER STATEMENT

Kleinburg is an historic rural village, founded in 1848. It enjoys a dramatic setting on a narrow ridge between the valleys of two branches of the Humber. It is connected by both road and history with Nashville, which grew up around the 1870 'Kleinburg' railroad station. The railroad created Nashville and served Kleinburg mills and industries, and the farms in the surrounding community. Within both Kleinburg and Nashville, the presence of a substantial stock of heritage buildings, and the continuous maintenance of the rural pattern of road profile, variety of building types and ages, streetscape and landscape elements, mature urban forestry, and modest scale of construction combine to preserve a heritage character that is worthy of conservation.

The Humber River has heritage value in its own right, both in pre-historical and historical terms, and it has the status of a Canadian Heritage River. The rivers and their valleys are historically connected to both Kleinburg and Nashville, as the site of the mills that originally brought both villages into being. The valleys have been a main determinant in Kleinburg's form and development. The village road layout, following topography, is unique in not having a single crossroad, only T-intersections. The valleys formed strict growth boundaries to the east and west, preventing the 'edge sprawl' that has overwhelmed the character of other rural villages, such as Maple; and also provided 'rural retreat' sites for the postwar resettlement that kept the village alive. The valleys are worthy of conservation for their historical connections to the villages, their role in determining the patterns of development, and as the defining element of Kleinburg's setting within the larger community.
