D 1.5 minimum FSI - 3.0 maximum FSI
-  major parks and open spaces
-  see policy 6.3.2

Preliminary Phasing Considerations

Prepared by:
Landart Design/IBI Arcadis

Landscape Precedents

Create a flexible space that enhances the connection to Black Creek from the interior roads.

Multi-purpose plaza/flex space.

Designed to be an ever changing focal point of the site [elements and uses shift in unison with Black Creek and seasons]

Form and design influenced by 'flowing' water.

The flow of the form creates movement/emphasis towards the Black Creek frontage.

Proposed Massing (View Looking Northwest)

Section AA - Transition to Neighbouring Properties

Development Proposal

Draft Rendering Elevation - May 12th 2022 - Not for Public Circulation and Distribution

Presentation - Committee of the Whole Public Meeting - 2951 Highway 7 & 180/190 Maplecrete Road - City of Vaughan

An aerial night-time rendering of a modern high-rise development. The image shows several tall, rectangular buildings with glass facades, illuminated from within and with blue-tinted exterior lighting. The buildings are arranged in a cluster, with a central courtyard area featuring trees and landscaping. Surrounding the development are various urban elements: a multi-lane highway with light trails from traffic, parking lots filled with cars, and other commercial buildings. The scene is set at night, with streetlights and building lights creating a vibrant urban atmosphere.
