City of Vaughn

Office of the City Clerk

This email expresses my opposition to the proposed high-rise development at the Northern and Southwestern precinct of Highway #7 and Weston Road.

The area already experiences a tremendous congestion with traffic at this intersection and subsequent ones.

The re-structure of Highway #7 lanes instead of making the traffic flow, created more clogging.

In addition to the proposed high-rise, the traffic will be chaotic and dangerous, as each resident will drive at least one car.

Prior to creating more traffic devastation, the area must be equipped with proper roads and bridges to ease the difficulty of the flow. You must prepare before you build, create projects smartly.

Streets in our neighborhoods will become main roads, as commuters would try to take other routes to avoid congested traffic.

This will create danger in our neighborhoods roads; where kids play, ride their bikes, walk to school, seniors and adults going for a refreshing walk or exercise. All would be jeopardized.

Our lifestyle and safety will be at risk.

Streets will be significantly crowded and parking will be an issue.

There is no parkland or open space in this area to provide to residents.

Just a simple routine of walking the dog, where? No green space whatsoever on Highway #7 and Weston Road.

The businesses in this area are conveniently located for us to access and shop.

This development will impact negatively our daily life, going to schools, to work, shopping or just walking our streets.

The harm this development will create is irreversible and as a resident concerned with everyone's well-being I strongly oppose this project development.

The collective opinion and concerns of residents must be taken into attention.

Please acknowledge this email has been taken into consideration and counted to oppose the project.

Regards

A worried and concerned resident

Laura De Flaviis-Risi
