**Subject:** [External] Block 41 Block Plan

Good afternoon,

Bell Canada thanks you for the opportunity to participate in review process for the above noted proposed Block Plan.

### **About Bell Canada**

Bell Canada is Ontario's principal telecommunications infrastructure provider, developing and maintaining an essential public service. The *Bell Canada Act*, a federal statute, requires that Bell supply, manage and operate most of the trunk telecommunications system in Ontario. Bell is therefore also responsible for the infrastructure that supports most 911 emergency services in the Province. The critical nature of Bell's services are declared in the *Bell Canada Act* to be "for the general advantage of Canada" and the *Telecommunications Act* affirms that the services of telecommunications providers are "essential in the maintenance of Canada's identity and sovereignty."

Provincial policy further indicates the economic and social functions of telecommunications systems and emphasizes the importance of delivering cost-effective and efficient services:

- The 2020 Provincial Policy Statement (PPS) requires the development of coordinated, efficient and cost-effective infrastructure, including telecommunications systems (Section 1.6.1).
- Section 1.7.1 I) of the 2020 PPS recognizes that "efficient and coordinated telecommunications infrastructure" is a component of supporting long-term economic prosperity.
- We note that the definition of infrastructure in the 2020 PPS is inclusive of communications / telecommunications, which is indicative of the importance in providing efficient telecommunications services to support current needs and future growth (Section 1.6.1).
- Furthermore, the 2020 PPS states that infrastructure should be "strategically located to support the effective and efficient delivery of emergency management services" (Section 1.6.4), which is relevant to telecommunications since it is an integral component of the 911 emergency service.

To support the intent of the *Bell Canada Act* and *Telecommunications Act* and ensure

consistency with Provincial policy, Bell Canada has become increasingly involved in municipal policy and infrastructure initiatives. We strive to ensure that a partnership be established which allows for a solid understanding of the parameters of Bell's infrastructure and provisioning needs and the goals and objectives of the municipality related to utilities.

### **Comments on the Block Plan**

Bell Canada is most interested in changes to the transportation network and/or policies and regulations relating to the direction of growth and public infrastructure investments, heritage character, urban design, broadband and economic development related objectives. We have reviewed the Block Plan, and although we have no specific comments at this time, Bell Canada would like to continue to ensure that the landowners are aware and familiar with our conditions as they pertain to forthcoming Site Plans, Draft Plans of Subdivision and/or Draft Plans of Condominium as follows:

### **Conditions**

*Condition:*

*The Owner acknowledges and agrees to convey any easement(s) as deemed necessary by Bell Canada to service this new development. The Owner further agrees and acknowledges to convey such easements at no cost to Bell.*

*The Owner agrees that should any conflict arise with existing Bell Canada facilities or easements within the subject area, the Owner shall be responsible for the relocation of any such facilities or easements at their own cost.*

*The Owner is advised to contact Bell Canada at [planninganddevelopment@bell.ca](mailto:planninganddevelopment@bell.ca) during the detailed utility design stage to confirm the provision of communication/telecommunication infrastructure needed to service the development.*

*It shall be noted that it is the responsibility of the Owner to provide entrance/service duct(s) from Bell Canada's existing network infrastructure to service this development. In the event that no such network infrastructure exists, in accordance with the Bell Canada Act, the Owner may be required to pay for the extension of such network infrastructure.*

*If the Owner elects not to pay for the above noted connection, Bell Canada may decide not to provide service to this development.*

### **Future Involvement**

We would like to thank you again for the opportunity to comment, Bell looks forward to a partnership and collaboration with the City of Vaughan and the landowners to provide advanced telecommunications infrastructure to this new community. Moving forward we would request that Bell continue to be circulated on any future materials and/or decisions released by the City in relation this initiative.

Yours truly,

Norm Lingard  
Senior Consultant – Municipal Liaison  
Network Provisioning
