Dear Vaughan City Council

I would like to explain why I completely object new condo building in our community

1.Impact to environment .

new condo will increase traffic and pollution in the area which will affect health of the residents mostly kids a and seniors.

2.impact to health services.

even now it is not easy to find family doctors on the area.With new condo it will be impossible task.Our medical center is already at capacity and with new condo getting your blood work will be very difficult due to increase demand

3.impact to education. both schools in the area already feeling the heat from

growing [community.one](#) of them built temporary classrooms.adding new condo will decrease quality of education for our kids

4.Quality of life .adjusted to condo streets will become parking lot.this will lead to extra pollution and difficulties for residents to get in and out of their houses

5.Decreased services.

we were always promised to have plaza on this lot.if it will go to condo, we will have to drive to supermarket to get bread or milk. it will affect our commitment as a city to fight climate change.

yours truly

Mykoa Mendrul
