

Committee of the Whole (2) Report

DATE: Tuesday, December 7, 2021

WARD(S): ALL

TITLE: WINTER MAINTENANCE UPDATE – DECLARATION OF
SIGNIFICANT WEATHER EVENT

FROM:

Zoran Postic, Deputy City Manager, Public Works

ACTION: DECISION

Purpose

To seek approval of the City of Vaughan's Winter Maintenance Policy to Declare a Significant Weather Event.

Report Highlights

- The Policy establishes criteria under which the Deputy City Manager, Public Works may declare a Significant Weather Event.
- A municipality may declare a significant weather event when a weather hazard has been identified that poses a significant danger to road users and an alert has been issued by Environment Canada.
- A declaration of a significant weather event would not change the City's regular maintenance procedures and is not a declaration of an emergency.
- During the course of a declared significant weather event, the standard timelines, as stated in the Provincial Regulations for municipalities to meet their maintenance obligations, are suspended until the significant weather event is declared to have been concluded.
- This policy reflects changes to Ontario Regulation 239/02 Minimum Maintenance Standards and will protect residents and the City.

Recommendations

1. That Council adopt the City of Vaughan's Winter Maintenance Policy to Declare a Significant Weather Event in alignment with legislative changes to Ontario Regulation 239/02 Minimum Maintenance Standards; and
2. That Council delegate authority to the Deputy City Manager, Public Works, or designate, to declare the beginning and end of a Significant Weather Event for the purposes of *Municipal Act, 2001* and Ontario Regulation 239/02 (Minimum Maintenance Standards for Municipal Highways), in accordance with the Policy.

Background

Ontario Regulation 239/02 establishes the Minimum Maintenance Standards for municipal road networks in Ontario

Ontario Regulation 239/02 was first enacted in 2002 to establish minimum maintenance standards for municipal road networks in Ontario. The City of Vaughan's Winter Maintenance Program has been designed to meet or exceed these minimum standards.

On May 3, 2018, Ontario Regulation 366/18 came into force, amending Ontario Regulation 239/02, providing municipalities with a mechanism to declare a significant weather event.

A significant weather event means an approaching or occurring weather hazard with the potential to pose a significant danger to users of the road network within a municipality.

A municipality may declare a significant weather event when a weather hazard has been identified that poses a significant danger to road users and an alert has been issued by Environment Canada in response to snow accumulation or ice formation on roads, sidewalks and/or bicycle lanes.

Declaring a Significant Weather Event protects residents and the City

Declaring a significant weather event protects residents and the City by providing a public notice that a significant weather event is occurring that poses danger, and by providing the City with greater protection from liability as it continues its work to address the weather conditions.

As per the most recent amendments to Ontario Regulation 239/02, a significant weather event means an approaching or occurring weather hazard has the potential to pose a significant danger to users of the road network within a municipality. A weather hazard

means the weather hazard determined by Environment Canada as meeting the criteria for the issuance of an alert under its Public Weather Alerting Program.

Previous Reports/Authority

1. Ontario Regulation 239/02 Minimum Maintenance Standards [O. Reg. 239/02: MINIMUM MAINTENANCE STANDARDS FOR MUNICIPAL HIGHWAYS](#)

Analysis and Options

A declaration of a Significant Weather Event would not change the City's regular winter maintenance procedures

The purpose of declaring a significant weather event for the City's roads, sidewalks and/or bicycle lanes is to advise the public of the potential dangers associated with the weather hazard and to deem City roads, sidewalks and/or bicycle lanes in a state of repair with respect to snow accumulation and ice conditions for the duration of the declaration.

The proposed policy includes specific criteria to ensure consistency in the declaration of a Significant Weather event. That criteria includes:

- The issuance of an Environment Canada Public Weather Alert
- Confirmation through local forecasting and observations that the weather hazard, which is subject of the Environment Canada Alert, is actually imminent or occurring in the City.

The City of Vaughan's road network plays an integral role in the daily movement of people and goods. The City will not change its regular winter maintenance procedures during the declaration of a significant weather event unless the weather hazard is so extreme that it creates conditions deemed unsafe for the operation of winter maintenance vehicles. The declaration of a significant weather event is not notice of a reduced service level or a road closure. The declaration is to notify the public that due to current or forecasted conditions, caution is to be observed when travelling along the City's road network and that it may take longer than usual to bring conditions of the roads, sidewalks and/or bicycle lanes back to a state of repair.

The declaration of a significant weather event suspends standard timelines stated in the Provincial Regulations

During the course of a declared significant weather event, the standard timelines, as stated in the Minimum Maintenance Standards for municipalities to meet their maintenance obligations, are suspended until the significant weather event is declared to have been concluded. During the course of a significant weather event, the roadways, sidewalks and/or bicycle lanes under the jurisdiction of the municipality are deemed to be in a state of repair, which protects the City from liability and mitigates risk.

The City will employ a comprehensive approach to communicating the declaration of a Significant Weather Event

Communications with respect to declaring the beginning and end of a Significant Weather Event will be made in accordance with the methods outlined in Ontario Regulation 239/02 (s. 16.9) and will include a variety of approaches, including a public service announcement, social media, website content and digital signs, to ensure the public is apprised of the declaration. Other key stakeholders, including Emergency Services and local partners, will also be advised.

A detailed Standard Operating Procedure has been developed in support of the policy for the declaration of a Significant Weather Event and forms part of the City's overall Winter Maintenance Standard Operating Procedures.

A declaration of a significant weather event is a distinctly separate process from a declaration of emergency under the Emergency Management and Civil Protection Act (RSO 1990).

It is recognized that severe winter weather can have greater consequences to the community beyond what is stated in this policy. Should the situation escalate in severity and results in significant consequences to the community, enhanced response activities will be determined by the Emergency Management Team.

Financial Impact

No financial implications are anticipated because of these recommendations.

Broader Regional Impacts/Considerations

On October 3, 2019, York Region updated their Winter Maintenance of Regional Roads policy to reflect the legislative changes to Ontario Regulation 239/02 Minimum Maintenance Standards regarding municipal declaration of significant weather events.

Public Works Senior Management will be in communication with key stakeholders, including York Region staff, to facilitate alignment between both levels of government when it comes to the declaration of significant weather events.

Conclusion

Winter maintenance across the City of Vaughan is a critical service with respect to ensuring public safety. The City's winter maintenance program is designed to meet the standards prescribed in Provincial regulations.

Amendments to the Ontario Regulation 239/02 Minimum Maintenance Standards provides municipalities with the ability to declare a significant weather event for roadways, sidewalks and/or bicycle lanes under their jurisdiction when a weather hazard has been identified that poses a significant danger to road users and an alert has been issued by Environment Canada.

The declaration of a significant weather event will advise the public of the potential dangers associated with the weather hazard and deem City roads, sidewalks and/or bicycle lanes in a state of repair with respect to snow accumulation and ice conditions for the duration of the declaration. A comprehensive communications approach will be employed to ensure members of the public are aware of the declaration of each Significant Weather Event. Declaring a Significant Weather Event protects residents and the City.

To ensure the City's policies are aligned with Provincial regulations, it is recommended that Council adopt the City of Vaughan's Winter Maintenance Policy to declare a significant weather event
