Hi NATALIE,

I will not be able to attend the public hearing on April 2nd but I would like to express my concern for the whole project, if not just the condo building. There is already a lack of infrastructure in this area. There is overpopulation and serious traffic. I don't believe we need to be building more until we can find ways to ease the traffic. People are driving through our school communities rushing to get to work or somewhere else every morning and afternoon making it extremely dangerous for our children.

Thank you,

SHARISE
