Where a height variance is approved, building height is applied to the style of roof (as defined in the City’s Zoning By-law) shown on the elevation plans submitted with the application.

- We have reviewed the proposed Variance Application and have the following concerns (attached below).

Alectra Utilities (formerly PowerStream) has received and reviewed the proposed Variance Application. This review, however, does not imply any approval of the project or plan.

All proposed billboards, signs, and other structures associated with the project or plan must maintain minimum clearances to the existing overhead or underground electrical distribution system as specified by the applicable standards, codes and acts referenced.

In the event that construction commences, and the clearance between any component of the work/structure and the adjacent existing overhead and underground electrical distribution system violates the Occupational Health and Safety Act, the customer will be responsible for 100% of the costs associated with Alectra making the work area safe. All construction work will be required to stop until the safe limits of approach can be established.

In the event construction is completed, and the clearance between the constructed structure and the adjacent existing overhead and underground electrical distribution system violates the any of applicable standards, acts or codes referenced, the customer will be responsible for 100% of Alectra's cost for any relocation work.

TRCA wishes to confirm that it has **no interests or concerns with the above noted application.**

Based on a review of our available mapping, the subject property is not within TRCA's Regulated Area. As such, a permit from TRCA pursuant to Ontario Regulation 166/06 would not be required for any development or site alteration on the property.

Although the site is located within the Well Head Protection Area for Quantity control (WHPA-Q2) per the Source Protection Plan, no water balance would be required recognizing this requirement would have been addressed through the subdivision approvals process.

Should further clarification be required, please contact the undersigned at your convenience.

3. To permit a minimum side yard setback of 0.61m for the proposed Cabana.

**By-Law Requirement(s) (By-law 001-2021):**

3. A minimum side yard setback of 1.2m is required. (Schedule A3)

**Official Plan:**

City of Vaughan Official Plan 2010 ('VOP 2010'): "Low-Rise Residential"

**Comments:**

The Owner is requesting permission to construct a cabana with pool equipment pad with the above noted variances.

The Development Planning Department has no objection to the proposed variances for the cabana, as the reduction in setbacks will not impact the abutting properties. The proposed rear yard setback of 0.91m and side yard setback of 0.61m maintains an appropriate area for access and drainage. The proposed cabana will also comply with the height requirements of the Zoning By-law.

The Development Planning Department has no objection to the proposed variances for the pool equipment. The proposed pool equipment will be visually screened from adjacent properties due to an existing fence along the rear and interior side yards.

Accordingly, the Development Planning Department can support the required variances and is of the opinion that the proposal is minor in nature, maintains the general intent and purpose of the Official Plan and Zoning By-law, and is desirable for the appropriate development of the land.

**Recommendation:**

The Development Planning Department recommends approval of the application.

**Conditions of Approval:**

If the Committee finds merit in the application, the following conditions of approval are recommended:

None
