

8274-8286 Islington Avenue, Woodbridge Heritage Impact Assessment

Addendum re: Retained Elements of 8274 Islington Avenue.

Since my Heritage Impact Assessment was written, the vendors, Vaughan Baptist Church, have decided to retain the front doors and transom of the old church building for re-use at their new home. As a result, Section 8 of the HIA is revised as follows:

8. Proposed Commemorative Elements

The owner proposes to retain a quantity of the bricks from the Church for re-use as low landscaping walls. According to local history and lore, the bricks are survivors of the original 1867 Church. Details as to locations of this commemorative installation will be determined by discussions with Heritage Staff.
