2. These Contract Documents are the property of the Architect. The Architect bears no responsibility for the interpretation of these documents by the Contractor. Upon written application, the Architect will provide written/graphic clarification or supplementary information to enable the Contractor to execute the work properly. The Architect will review Shop Drawings submitted by the Contractor for design conformance only.
3. Drawings are not to be scaled for construction. The Contractor is to verify all existing conditions and dimensions required to perform the work and report any discrepancies with the Contract Documents to the Architect before commencing any work.
4. Positions of exposed finished mechanical or electrical devices, fittings, and fixtures are indicated on architectural drawings. The locations shown on the architectural drawings govern over the Mechanical and Electrical drawings. These items not clearly located will be located as directed by the Architect.
5. These drawings are not to be used for construction unless noted below as "Issuance: For Construction".
6. All work is to be carried out in conformance with the Code and Bylaws of the authorities having jurisdiction.
7. The Architect of these plans and specifications gives no warranty or representation to any party about the constructability of the building(s) represented by them. All contractors or subcontractors must satisfy themselves when bidding and at all times ensure that they can properly construct the work represented by these plans.

A-1.03

STANDARD CITY OF VAUGHAN SITE PLAN NOTES:

(1) Standard drawings of the City of Vaughan constitute part of the site plan drawing(s).

(2) All construction work to be carried out in accordance with the requirements of the Occupational Health and Safety Act and Regulations for construction projects.

(3) The Owner shall retain the services of his consultants to ensure required inspection reports and/or certification requirements are submitted to the Engineering Department and other affected City Departments.

(4) The Owner and/or his representative shall rectify all disturbed are as to original condition or better and to the satisfaction of the City.

(5) The location of all under/above ground utilities and structures is approximate only and where shown on the drawing(s) the accuracy of the location of such utilities is not guaranteed. The owner and/or his representative shall determine the location of all such utilities and structures by consulting the appropriate authorities or utility companies concerned. The owner shall prove the location of such utilities and structures and shall assume all liability for damage or restoration or adjustment for the same.

(6) Any conflicts with existing services shall be rectified at the Owner's expense.

(7) Sanitary and storm control manholes shall be in accordance with Provincial Standard OPSD 701.010. Frame and cover shall be McCoy HM331 or approved equal. The manholes shall be benched to the obvert (top) of pipes.

(8) All sanitary manhole covers in the ponding are as to be watertight sealed covers.

(9) All catchbasins shall be installed in accordance with City Standard Drawing K-4. All catchbasin frames and covers shall be McCoy HM311 or approved equal.

(10) All industrial/commercial/condominium watermain connections shall be constructed in accordance with City Standard Drawings C-102, C-103 and W-106.

(11)Watermain shall have a minimum vertical separation of 0.5m and horizontal separation of 2.5m between any sewer or manhole.

(12) Hydrants to be installed as per City Standard W-104 with 1.0m minimum clear from all obstructions.

(13) Entrance driveways shall be constructed with heavy duty asphalt from the back of the municipal curb or edge of pavement to the property line (area highlighted on drawing(s) in accordance with the following specifications:
- a. 50mm compacted depth of HL3 asphalt - top course
- b. 75mm compacted depth of HL8 asphalt - binder course
- c. 150mm compacted depth of 20mm crusher run limestone - granular base
- d. 300mm compacted depth of 50mm crusher run limestone - granular sub-base

(14) All concrete curb from existing road curb to street line shall be barrier curb OPSD 600.110. All concrete curb heights shall be 150mm unless otherwise noted. Entrance driveway curb to be discontinuous at sidewalk and tapered back 600mm minimum.

(15) All required curb cutting at entrance driveway and curb depressions at sidewalk crossings shall be installed to the satisfaction of the City.

(16) Existing roadway curb and gutter to be continuous through the proposed new driveway entrance(s) along with the municipal sidewalk.

(17) Sidewalk to be 200mm thick through entrance driveway entrance per City Standard R-128.

(18) Frost collars are to be provided on curb stops and valve boxes when located within the limits of the driveways.

(19) Entrance driveways shall be setback a minimum clearance of 1.0m from all aboveground services or other obstructions.

(20) Appropriate construction details should be provided for retaining walls higher than 1.0m. Details shall be designed and certified by a professional engineer upon approval. Handrail/guard/fence is required when height exceeds 0.60m (as per City Standard Drawing FRW-105 or approved equal). Upon completion retaining walls greater than 1.0m to be certified by a structural and geotechnical engineer.

(21) Landscape shall not encroach on boulevard nor shall boulevard grades be altered.

(22) Slopes in landscaped areas and on berms shall not exceed 3 horizontal to 1 vertical.

(23)Pavement grades (min. 0.5%, max 5%).

(24) Drainage grassed swales with grades (min. 2%, max 5%).

(25) Outside lighting shall be directed downward and inward and designed to maintain zero cut-off light level distribution at the property line.

(26) Sanitary, storm and water service connections which are not in place on the municipal road allowance to the property line shall be arranged for installation by the City on payment of installation costs by the owner. To initiate the installation of the service connection(s), the owner shall file an application with the Development Inspection & Lot Grading Division of the Development Engineering Department which includes 2 copies of the approved site plan drawing(s) with Department's approval seal and if required a copy of the Regional Approval Schedule as per the executed Site Plan Agreement.

(27) Silt fence(s) to be installed and maintained to prevent silt flowing onto adjacent lands until the completion of sodding activities.

(28) Construction access shall be constructed with a minimum depth of 450mm crushed stone base from the municipal curb or edge of pavement to the property line, to the satisfaction of the City.

(29) The surface of all loading spaces and related driveways, parking spaces, and maneuvering areas within the site shall be paved with a hard surface. The recommended minimum depth requirements are as follows:
- a. 40mm compacted depth HL3 asphalt - top course
- b. 50mm compacted depth HL8 asphalt - binder course
- c. 150mm compacted depth 20mm crusher run limestone - granular base
- d. 200mm compacted depth 50mm crusher run limestone - granular sub-base

(30) Condominium unit driveways - the minimum recommended depth requirements are as follows:
- a. 25mm compacted depth HL3 asphalt top course
- b. 50mm compacted depth HL8 asphalt base course
- c. 200mm compacted depth 20mm dia. crusher run limestone

Top course asphalt shall not be placed until the base course asphalt has been in place for one winter season. Other hard surfaces may be installed as approved by the City.

(31) The Consulting Engineer shall design, implement and monitor the erosion and sediment control measures during all phases of construction on the lands in accordance with the TRCA Erosion and Sediment Control Guidelines for Urban Construction dated December 12, 2006, to the satisfaction of the City and TRCA.

(32) All proposed parking spaces for disabled to include "Rb-93 BY PERMIT ONLY" traffic sign and pavement disabled symbol marking in accordance with City Standard Drawing.

STANDARD SITE PLAN NOTES FOR CITY OF VAUGHAN

SITE PLAN ACCESSIBILITY NOTES

ACCESSIBLE PARKING SPACES
PATH OF TRAVEL: 1500 mm (min.) wide to accessible entrance.
LOCATION: within 30 m of accessible entrance
SURFACE: firm, stable and slip-resistant.
RUNNING SLOPE: 1:50 (max.).
CROSS-SLOPE: 1:50 (max.).
OVERHEAD CLEARANCE: 2100 mm or 2750 mm for van accessible spaces.
TYPE A SPACE: 3400 mm (min.) wide x 5800 mm (min.) long.
TYPE B SPACE: 2400 mm (min.) wide x 5800 mm (min.) long.
ACCESS AISLE: 1500 mm (min.) wide, clearly marked, adjacent to accessible parking space.
Note: Two adjacent accessible parking spaces may share an access aisle.
DIRECTIONAL SIGNAGE: provided to guide users to nearest accessible entrance.

VERTICAL SIGNAGE:
Width 300 mm (min.) x Height 450 mm (min.).
Mounted 1500 to 2000 mm high at centre.
Marked with International Symbol of Accessibility.

PAVEMENT SIGNAGE:
Marked with International Symbol of Accessibility.
Length 1525 mm (min.) x Width 1525 mm (min).

EXTERIOR PATHS OF TRAVEL:
SURFACE: firm, stable and slip-resistant.
HEADROOM CLEARANCE: 2400 mm (min.).
LIGHTING: 50 lux (5 foot-candles) (min.) at components (e.g., stairs, ramps and rest areas).
CLEAR WIDTH: 1500 mm.
RUNNING SLOPE: 1:20 (5%) (Max.).Note: If walkways exceed 5%, a ramp is required.
CROSS-SLOPE: 1:50 (2%) (Max.).
REST AREA: provided at every 30 m along path of travel.

STAIRS:
SURFACE: slip-resistant and non-glare.
TREAD 280 to 355 mm deep, uniform.
RISER: 125 to 180 mm high, uniform.
OPEN RISER:
NOSING PROJECTION: 38 mm (max.).
NOSING STRIP: 50 mm deep; colour contrasted, at leading edge of tread, extending full width of tread.
TACTILE ATTENTION INDICATOR (TAI)
SURFACES: 610 mm (min.) deep, at top of stairs, one tread back. Note: Refer to Section 2.7, Tactile Walking Surface Indicators for detailed requirements.
LIGHTING: 50 lux (5 foot-candles) (min.).
HANDRAIL: 865 to 965 mm high on both sides. Note: Refer to Section 2.4, Guards and Handrails for detailed requirements.

BUILDING ENTRANCE
PROVISION: At least one (1) accessible entrance or 50%of the total number of building entrances (Main or primary entrance to be accessible, with level access (preferred)).

A-1.04

STANDARD CITY OF VAUGHAN SITE PLAN NOTES:

(1) Standard drawings of the City of Vaughan constitute part of the site plan drawing(s).

(2) All construction work to be carried out in accordance with the requirements of the Occupational Health and Safety Act and Regulations for construction projects.

(3) The Owner shall retain the services of his consultants to ensure required inspection reports and/or certification requirements are submitted to the Engineering Department and other affected City Departments.

(4) The Owner and/or his representative shall rectify all disturbed are as to original condition or better and to the satisfaction of the City.

(5) The location of all under/above ground utilities and structures is approximate only and where shown on the drawing(s) the accuracy of the location of such utilities is not guaranteed. The owner and/or his representative shall determine the location of all such utilities and structures by consulting the appropriate authorities or utility companies concerned. The owner shall prove the location of such utilities and structures and shall assume all liability for damage or restoration or adjustment for the same.

(6) Any conflicts with existing services shall be rectified at the Owner's expense.

(7) Sanitary and storm control manholes shall be in accordance with Provincial Standard OPSD 701.010. Frame and cover shall be McCoy HM331 or approved equal. The manholes shall be benched to the obvert (top) of pipes.

(8) All sanitary manhole covers in the ponding are as to be watertight sealed covers.

(9) All catchbasins shall be installed in accordance with City Standard Drawing K-4. All catchbasin frames and covers shall be McCoy HM311 or approved equal.

(10) All industrial/commercial/condominium watermain connections shall be constructed in accordance with City Standard Drawings C-102, C-103 and W-106.

(11)Watermain shall have a minimum vertical separation of 0.5m and horizontal separation of 2.5m between any sewer or manhole.

(12) Hydrants to be installed as per City Standard W-104 with 1.0m minimum clear from all obstructions.

(13) Entrance driveways shall be constructed with heavy duty asphalt from the back of the municipal curb or edge of pavement to the property line (area highlighted on drawing(s) in accordance with the following specifications:
- a. 50mm compacted depth of HL3 asphalt - top course
- b. 75mm compacted depth of HL8 asphalt - binder course
- c. 150mm compacted depth of 20mm crusher run limestone - granular base
- d. 300mm compacted depth of 50mm crusher run limestone - granular sub-base

(14) All concrete curb from existing road curb to street line shall be barrier curb OPSD 600.110. All concrete curb heights shall be 150mm unless otherwise noted. Entrance driveway curb to be discontinuous at sidewalk and tapered back 600mm minimum.

(15) All required curb cutting at entrance driveway and curb depressions at sidewalk crossings shall be installed to the satisfaction of the City.

(16) Existing roadway curb and gutter to be continuous through the proposed new driveway entrance(s) along with the municipal sidewalk.

(17) Sidewalk to be 200mm thick through entrance driveway entrance per City Standard R-128.

(18) Frost collars are to be provided on curb stops and valve boxes when located within the limits of the driveways.

(19) Entrance driveways shall be setback a minimum clearance of 1.0m from all aboveground services or other obstructions.

(20) Appropriate construction details should be provided for retaining walls higher than 1.0m. Details shall be designed and certified by a professional engineer upon approval. Handrail/guard/fence is required when height exceeds 0.60m (as per City Standard Drawing FRW-105 or approved equal). Upon completion retaining walls greater than 1.0m to be certified by a structural and geotechnical engineer.

(21) Landscape shall not encroach on boulevard nor shall boulevard grades be altered.

(22) Slopes in landscaped areas and on berms shall not exceed 3 horizontal to 1 vertical.

(23)Pavement grades (min. 0.5%, max 5%).

(24) Drainage grassed swales with grades (min. 2%, max 5%).

(25) Outside lighting shall be directed downward and inward and designed to maintain zero cut-off light level distribution at the property line.

(26) Sanitary, storm and water service connections which are not in place on the municipal road allowance to the property line shall be arranged for installation by the City on payment of installation costs by the owner. To initiate the installation of the service connection(s), the owner shall file an application with the Development Inspection & Lot Grading Division of the Development Engineering Department which includes 2 copies of the approved site plan drawing(s) with Department's approval seal and if required a copy of the Regional Approval Schedule as per the executed Site Plan Agreement.

(27) Silt fence(s) to be installed and maintained to prevent silt flowing onto adjacent lands until the completion of sodding activities.

(28) Construction access shall be constructed with a minimum depth of 450mm crushed stone base from the municipal curb or edge of pavement to the property line, to the satisfaction of the City.

(29) The surface of all loading spaces and related driveways, parking spaces, and maneuvering areas within the site shall be paved with a hard surface. The recommended minimum depth requirements are as follows:
- a. 40mm compacted depth HL3 asphalt - top course
- b. 50mm compacted depth HL8 asphalt - binder course
- c. 150mm compacted depth 20mm crusher run limestone - granular base
- d. 200mm compacted depth 50mm crusher run limestone - granular sub-base

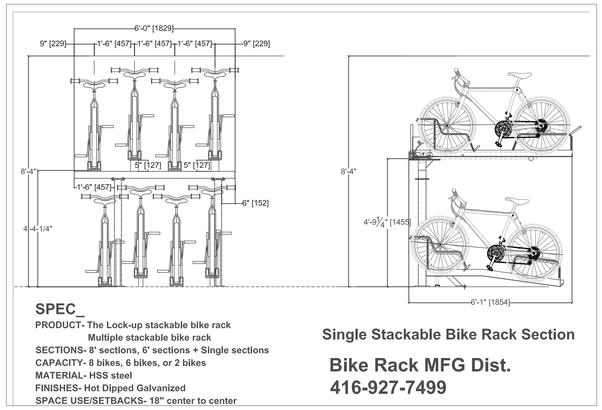
(30) Condominium unit driveways - the minimum recommended depth requirements are as follows:
- a. 75mm compacted depth HL3 asphalt top course
- b. 50mm compacted depth HL8 asphalt base course
- c. 200mm compacted depth 20mm dia. crusher run limestone

Top course asphalt shall not be placed until the base course asphalt has been in place for one winter season. Other hard surfaces may be installed as approved by the City.

(31) The Consulting Engineer shall design, implement and monitor the erosion and sediment control measures during all phases of construction on the lands in accordance with the TRCA Erosion and Sediment Control Guidelines for Urban Construction dated December 12, 2006, to the satisfaction of the City and TRCA.

(32) All proposed parking spaces for disabled to include "Rb-93 BY PERMIT ONLY" traffic sign and pavement disabled symbol marking in accordance with City Standard Drawing.

STANDARD SITE PLAN NOTES FOR CITY OF VAUGHAN



STACKABLE_3

SITE PLAN ACCESSIBILITY NOTES

ACCESSIBLE PARKING SPACES
PATH OF TRAVEL: 1500 mm (min.) wide to accessible entrance.
LOCATION: within 30 m of accessible entrance
SURFACE: firm, stable and slip-resistant.
RUNNING SLOPE: 1:50 (max.).
CROSS-SLOPE: 1:50 (max.).
OVERHEAD CLEARANCE: 2100 mm or 2750 mm for van accessible spaces.
TYPE A SPACE: 3400 mm (min.) wide x 5800 mm (min.) long.
TYPE B SPACE: 2400 mm (min.) wide x 5800 mm (min.) long.
ACCESS AISLE: 1500 mm (min.) wide, clearly marked, adjacent to accessible parking space.
Note: Two adjacent accessible parking spaces may share an access aisle.
DIRECTIONAL SIGNAGE: provided to guide users to nearest accessible entrance.

VERTICAL SIGNAGE:
Width 300 mm (min.) x Height 450 mm (min.).
Mounted 1500 to 2000 mm high at centre.
Marked with International Symbol of Accessibility.

PAVEMENT SIGNAGE:
Marked with International Symbol of Accessibility.
Length 1525 mm (min.) x Width 1525 mm (min).

EXTERIOR PATHS OF TRAVEL:
SURFACE: firm, stable and slip-resistant.
HEADROOM CLEARANCE: 2400 mm (min.).
LIGHTING: 50 lux (5 foot-candles) (min.) at components (e.g., stairs, ramps and rest areas).
CLEAR WIDTH: 1500 mm.
RUNNING SLOPE: 1:20 (5%) (Max.).Note: If walkways exceed 5%, a ramp is required.
CROSS-SLOPE: 1:50 (2%) (Max.).
REST AREA: provided at every 30 m along path of travel.

STAIRS:
SURFACE: slip-resistant and non-glare.
TREAD 280 to 355 mm deep, uniform.
RISER: 125 to 180 mm high, uniform.
OPEN RISER:
NOSING PROJECTION: 38 mm (max.).
NOSING STRIP: 50 mm deep; colour contrasted, at leading edge of tread, extending full width of tread.
TACTILE ATTENTION INDICATOR (TAI)
SURFACES: ±10 mm (min.) deep, at top of stairs, one tread back. Note: Refer to Section 2.7, Tactile Walking Surface Indicators for detailed requirements.
LIGHTING: 50 lux (5 foot-candles) (min.).
HANDRAIL: 865 to 965 mm high on both sides. Note: Refer to Section 2.4, Guards and Handrails for detailed requirements.

BUILDING ENTRANCE
PROVISION: At least one (1) accessible entrance or 50%of the total number of building entrances
(Main or primary entrance to be accessible, with level access (preferred)).

Bird Safe Treatment Exterior Specification Checklist

Applicant to include checklist on Elevation Drawing(s) at first site plan submission. Drawing(s) to be stamped and signed by an OAA member.

Mandatory Primary Treatments for all site and draft plan applications.

At Grade Condition (check to confirm the below is applied)

- [x] Bird safe treatment (s) are applied on minimum 90% of contiguous glass panel area, and within 16m from finished grade or to the height of the adjacent mature tree canopy, whichever is greater.
- [x] Treatments are applied to all glass panel areas that creates fly-through conditions and are adjacent to natural heritage features.
- [x] Treatments are identified and redlined on the elevation drawing(s).

Roof Landscape Conditions (check to confirm the below is applied)

- [x] Development contains no glass panel within 16m from roof level finished grade.
- [x] If glazing is adjacent to green roofs and/or rooftop vegetation, bird safe treatment is applied at a height of 4m from the surface of the green roof or the height of the adjacent mature vegetation, whichever is greater

1 202301 Vaughan Bird Safe Standards Info Package_SP

BIRD SAFE TREATMENT EXTERIOR SPECIFICATION

- BIRD SAFE TREATMENT(S) ARE APPLIED ON MINIMUM 90% OF CONTIGUOUS GLASS PANEL AREA, AND WITHIN 16m FROM FINISH GRADE OR TO THE HEIGHT OF THE ADJACENT MATURE TREE CANOPY, WHICHEVER IS GREATER.

- TREATMENTS ARE APPLIED TO ALL GLASS PANEL AREAS THAT CREATE FLY-THROUGH CONDITIONS AND ARE ADJACENT TO NATURAL HERITAGE FEATURES.

- TREATMENTS ARE IDENTIFIED AND REDLINED ON THE ELEVATION DRAWING(S).

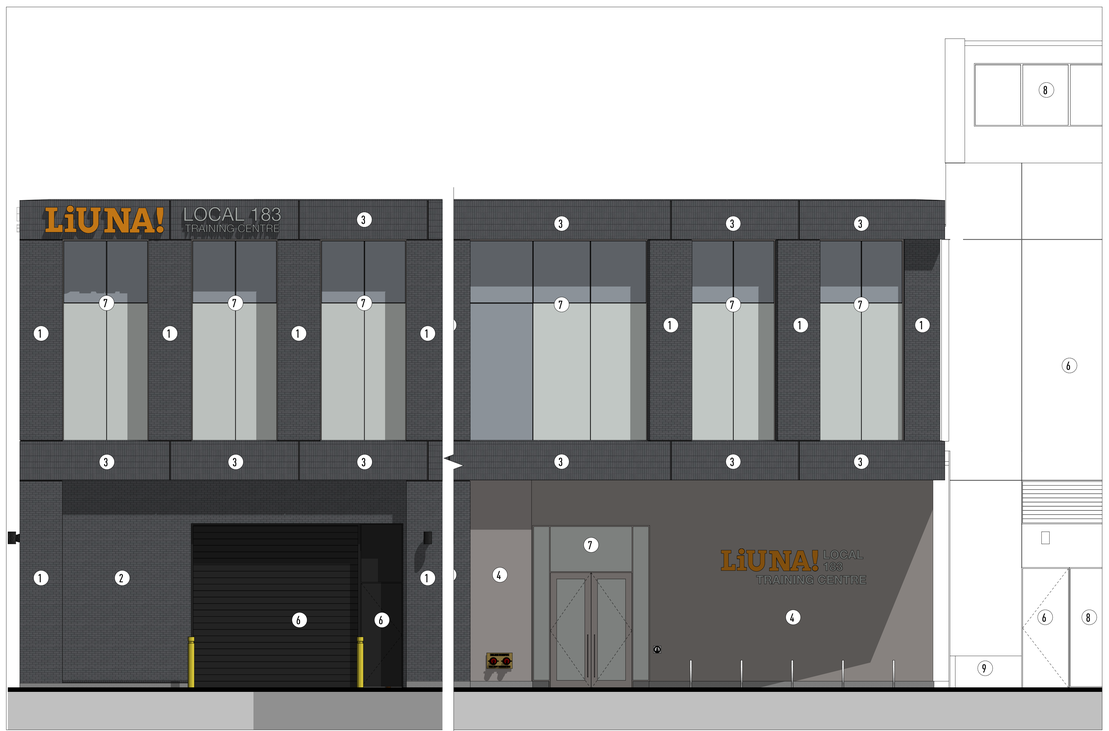
M8 E-01 ENLARGED SOUTH ELEVATION AT ENTRANCE TO BUILDING 'A' & 'E'

scale: 1:50



M8 E-03 ENLARGED NORTH ELEVATION AT WORKSHOP TO BUILDING 'A'

scale: 1:50

M8 E-02 ENLARGED NORTH ELEVATION AT ENTRANCE TO BUILDING 'A'

scale: 1:50

EXTERIOR FINISHES FOR BUILDING 'A' & 'E'

1A 1/3 RUNNING BOND

BUILDING 'A'
ENDICOTT - MANGANESE IRONSPOT, SMOOTH THIN BRICK, 1/2" MODULAR OR NORMAN 1/3 RUNNING BOND

5 ZINC MTL. CLADDING ANTHRA ZINC/ BLACK

BUILDING 'A'

METAL CLADDING FOR SOUTH ENTRANCE CANOPY

VM ZINC - ANTHRA-ZINC/ BLACK PIGMENT

1B RUNNING BOND

BUILDING 'A'
ENDICOTT - MANGANESE IRONSPOT, SMOOTH THIN BRICK, 1/2" MODULAR OR NORMAN 1/2 RUNNING BOND

6 METAL CLADDING - GRAPHITE GRAY

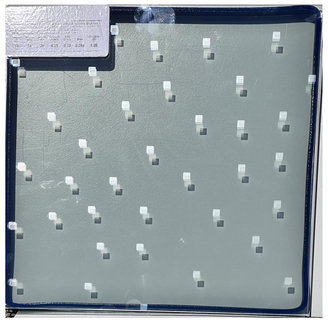
WORKSHOP 'E'

PPG - DURANAR XL - GRAPHITE GRAY - UC115095XL or SIMILAR

WORKSHOP 'E' TO BE METAL CLAD AND OF ONE COLOUR, GRAPHITE GREY. THIS COLOUR IS NEARLY BLACK BUT WITH JUST ENOUGH SPECKLE WITHIN TO ALLOW FOR SOME DEPTH AND REFLECTION PENDING ANGLE OF SUN, SO THE PROPOSED BUILT FORM DOES NOT APPEAR FLAT.

2 WOVEN BOND, ALTERNATING SIZE & THICKNESS

BUILDING 'A'
ENDICOTT - MANGANESE IRONSPOT, SMOOTH THIN BRICK, 1/2" & 1" MODULAR & NORMAN WOVEN BOND



7 CLEAR TEMPERED IGU FOR CURTAIN WALL GLAZING

BUILDINGS 'A', 'E', 'H'

ALL CLEAR GLASS & SHADOW BOX/ SPANDREL TO HAVE BIRD-FRIENDLY ACID ETCH PATTERN ON SURFACE #1.

GUARDIAN GLASS - SN54-DX22 ULTRA CLEAR

3 STACK BOND

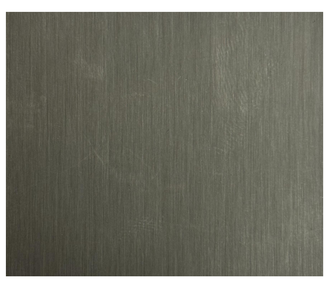
BUILDING 'A'
ENDICOTT - MANGANESE IRONSPOT, SMOOTH THIN BRICK, 1/2" MODULAR OR NORMAN STACK BOND

8 FROSTED GLASS

WORKSHOP 'E'

FROSTED GLASS FOR FIXED GLAZING AT GRADE & SKYLIGHTS

GUARDIAN GLASS - SN54 ULTRA CLEAR W/ ACID ETCH SATIN FINISH



4 ZINC MTL. CLADDING QUARTZ/ OXIDIZED

BUILDINGS 'A', 'H'

METAL CLADDING FOR NORTH & SOUTH ENTRANCES, SOFFIT, LINK TO HERITAGE BUILDING

VM ZINC - QUARTZ-ZINC

9 CONCRETE CURB

WORKSHOP 'E'

CONCRETE CURB AT GRADE FOR ALL EXTERIOR WALL CLADDING, 750MM (H)
