Hi Christine,

I would like to add following comment to previous one.

The drawing shows that owners at 16 Cantertrot court have proposed moving their pool equipment from end of south side yard to middle of south side yard right beside A/C unit, this location is right outside in front of our living/dinning room window(1.5m x 1.5m) on first floor and below the bedroom window on second floor, this would be very noisy(pool equipment + A/C unit) even if we close the windows all the time specially first floor with a large window, even right now being more than 5 meters away and all windows close it is noisy on both floors.

We should be able to open our windows once in while specially in summer and enjoy fresh air without hearing pool heater, pump and A/C making loud noise all at the same time right outside of our windows and at night is even worse because sound travel farther at night also this will affect negatively the value of our property and lower the number of potential offers and buyers in future.

So we hope committee consider above issues in making their decision as enjoying a pool should not be at other people's inconvenience and expense.

Regards.
Astrid Acevedo
