To Whom It May Concern,

I am not sure if you are aware of what is going on in our small community of Bolton, Ontario.

We are being barricaded with thousands of truck lots popping up almost daily. How can you allow this at the expense of our children? We have many deaths in our community which go unannounced. How would you like it if this happened to your child or your elderly parents? It could happen to any of us. We cannot maneuver around thousands of transport trailers daily. They have taken over our community, please let's work together to have them relocated away from our schools, homes and places of worship. The transport trucks are parked within our community. Below is one out of hundreds of applications. If any of you live or pass through our small community you will understand how dangerous it is to issue permits to these owners who are applying for permits along Albion Vaughan Road and Highway 50. This must stop immediately.
