I would like to register my strong objection to the proposed building of a 7-14 storey building on this very busy corner. It is very concerning that the safety, accessibility and historic look and feel of our community is being ignored. There have been endless studies about the lack of parking and traffic flow in around our lovely historic village. How can a huge monstrosity even be considered given all this? This would severely limit access and pedestrian traffic in our already congested community. I urge the members of council to consider the long term impact of allowing such a blatant ignorance of the wishes of the voters and residents of the village in allowing this.

Thank you

Lorraine McNair
