I am not able to attend the set meeting tomorrow regarding the above application, but I would like to see the drawing for the proposed house and to have someone explain to me, specifically, what the minor variance is, that is being requested.

I would also like to enter a concern about the trees and brushes that are at the boarder of our two properties. I would like someone to ensure me in writing that they will be preserved. There are currently large and small trees on our side of the property and I want to ensure that they are not damaged or removed with the construction of the new house.

We also have a water run off pathway that divides our properties and I want to ensure that the construction doesn't affect our shared water systems, especially since we are on well water.

On a different note, I would also like an update on the progress of the land development of the two 10 acre properties behind our house off of Kirby Road.

I look forward to your reply.

Anne Eliraz
