To Whom It May Concern,

I am writing to express my strong opposition to Proposal 19T-25V002. The idea of constructing two condominium towers—totaling over 500 units—deep within a quiet, established residential area is completely unacceptable and goes against the original development plans for our community.

There was never any indication that high-density condos would be built within subdivisions surrounded by multimillion-dollar, single-family homes. This proposal is not only out of place, but it threatens to significantly degrade the character, safety, and integrity of our family-friendly neighborhood.

I am demanding a clear explanation of the immediate and long-term implications this proposal would have on our community, including but not limited to:

- Increased traffic congestion on streets not designed for high-volume use
- Overburdening of local infrastructure, schools, and services
- Loss of privacy and decreased property values for existing homeowners
- Disruption of the peaceful environment that residents invested in when purchasing their homes

This proposal must be reconsidered. I, along with many other concerned residents, will continue to voice our opposition through every appropriate channel available.

Regards,

Adam De Angelis
