Hi Christine, I went back to the municipal correspondence as we had highlighted this to staff previously as you can see our communication was back on March 02 we were given direction that this was not going to trigger a variance See below. In an effort to expedite the other elements of the application w propose that for this application we will remove the variance no 6 relating to the reverse slope driveway and proceed as scheduled for the remaining variances.

Considering the incorrect information was provided by the city we insist on having the variance no. 6 be heard separately if we decide to proceed with it but we want there to be a no cost to the application and hearing for that variance. We consider this to be a fair accommodation.

We would like this email and the supporting communication attached to be entered into the application and circulated to the committee. So that they have a clear understanding of the WHY we removed the variance at such a late date.

Thank you and advise us of what steps we need to do to accommodate this direction.

Subject: RE: Reverse slope driveway-By law requirements

Hi Ailin,

The proposed drawing shows a ramp to the underground parking, it is not considered a reverse slope driveway. No minor variance is required for the ramp.

Regards,

Faegheh Gholami
