Subject: [External] 41 Thornbank Rd, Thornhill

Dear Sir or Madam,

I am writing to take issue with this applicants desire to destroy at least 6 70 ft. High spruce in the backyard of this property.

I personally know that this houses many varieties of birds including Baltimore Orioles, Cardinals, Finches and Warblers. In the application, it is said that the pool is shaped to accommodate the trees. How?

The front driveway might be changed to accommodate trees but the damage to wildlife and the privacy of the next door neighbours is infinite.

The height of the proposed structure is higher than next door. Now will that set the standard for the open lot on the other side of the property when they can take the average of the two buildings next to it.

How about the density of the buildings to the lot size. This applicant is proposing to literally pave over paradise. For an acre lot how much will under house, patio, pool and out buildings? How will this effect water management and drainage etc.?

Regards,
Joan Honsberger
Thornhill
