Hello,

Please find attached a letter to be added to tomorrow agenda regarding the above properties application.

I would also like to speak to this item and will send the form momentarily.

Thanks,
Irene

Re: Public Meeting June 1 @ 7pm, Agenda Item 3(4) Entitled Royal King Valley Holdings Inc. Zoning By-Law Amendment File Z.21.004 Temporary Use 3230 King Vaughan Road Vicinity of King Vaughan Road and Highway 400

Mayor Bevilacqua, Regional Councillors and Local Councillors,

The combination of the current provincial government's complete and utter disregard for environmental protection, persistence to push through the nonsensical Highway 413 and the pandemic has resulted in me paying acute attention to local planning decisions in the City of Vaughan. I have been continually disappointed by the governance in Vaughan, the lack of political will and enforcement by staff and the connections that have been found to overly influential powerful developers, in particular with MZOs and lands surrounding the proposed highway 413.

Of all of the research I have done this year 3230 King Vaughan Road has opened my eyes the most and been the most upsetting to me personally. The level of non-compliance and lack of action or ability to act by the City of Vaughan is disturbing. The following is a summary of what I have found.

- A pre-fabricated structure was erected in 2018 without a building permit, conveniently when the King-Vaughan Road was closed due to bridge construction from the expanded Highway 400.
- A fence that appears higher than permitted by the City's current by-laws surrounds the site and weather intentional or not conceals site activities from the public.
- Vaughan by-law was notified in 2018 when construction started yet a **Notice of Violation was not issued until May 19, 2020¹**.
- **Vaughan Building Standards issued a Order to Comply September, 2018 and a Stop Work Order November 2018** (refer to Attachment 1). The building is still standing and it is unclear if any further action has been taken other than to 'bring the applicant into compliance' through submission of the development application.
- **There is nothing temporary about this site** they have poured a 15cm thick concrete pad over an area greater than 1,500 m²/16,000 ft²

¹ Refer to pg. 2: <https://pub-vaughan.escrimemeetings.com/filestream.ashx?DocumentId=71120>

- **There is nothing proposed in this development application** they are operating and had trucks going all day last Sunday May 30, 2021 from 8am to 6pm
- The applicants planned activities for this site are unclear and the application lacks sufficient details. **They indicate they will manage ‘material’ but do not provide sufficient details to be able to confirm or deny if they are planning to manage and conduct activities that require approval under the Environmental Protection Act.**
- There are three certificates of registration approved by the MECP². **The Site is not approved under the Environmental Protection Act nor have they applied to be a ‘waste receiving site’ yet they have applied to have their trucks approved for a waste haulage system to haul various materials, including but not limited to: contaminated soil and biosolids.**
- The local Environmental Officer was emailed and confirmed that the site is not nor have they applied to become a ‘waste receiving site’ yet dump trucks full of undefined ‘material’ are observed entering and exiting the site daily. How is the public to know what ‘material’ is being managed and if it is being managed as per the applicable legislation.

Already the City of Vaughan has a legacy at 5550 Langstaff Road, Kleinberg that has been going on for decades³. Council cannot pretend to not know the risks and what can happen with rouge developers/businesses.

City of Vaughan Staff responses when inquiry about this project have been mixed. Vaughan planning staff were transparent that the site was not operating illegally on a site agriculturally zoned site with exceptions for school bus storage as per By-Law about this site with Vaughan planning staff continually directed me to inquire with by-law 1-88 Exception 9(670). Planning staff were not transparent when asked about the building code violation and at no point suggested I should contact Building Standards. When Building Standards was asked they did promptly indicate an order had been issued against the site but offered no further information.

It is unclear if the City of Vaughan even has authority to approve what it being requested since the area is within the GTA West Corridor Focused Area of Analysis.

For such gross non-compliance and blatantly not following the by-laws and legislation there appears to have been little to no consequences the site never stopped operating. I would have never believed a municipal government would have such little power and ability to do anything

in the face blatant illegal operations and construction. It remains unclear to me if it is a lack of political will, staff inability to do anything or there are simply no consequences.

Please do not approve this application and consider conducting a review to determine why there has been such little action and ability for Vaughan staff to act and enforce compliance with legislation and by-laws.

Thank you,
Irene Ford
