Development Planning:

Vaughan Official Plan 2010 ('VOP 2010'): "Low-Rise Residential"

The Owner is requesting permission to construct an uncovered pool equipment pad and rear yard swimming pool to an existing dwelling. The Development Planning Department does not object to the proposed variances, as the minimum rear yard setback of 1.19 m to the pool is being measured from the shortest point increasing in distance towards the south-east corner of the lot. In addition, the Owner provided adequate distance to allow for safe access around the waters edge. With respects to the pool equipment pad, the Owner revised their site plan to indicate the equipment pad is surrounded by gravel which has satisfied the Development Engineering staff requirements and will not cause any related water filtration/drainage issues.

The Development Planning Department is of the opinion the proposal is minor in nature, maintains the general intent and purpose of the Official Plan and Zoning By-law, and is desirable for the appropriate development of the land.

Development Engineering:

Although the typical required setback for pool equipment pad is 0.6m from the property line, but the proposed fiberglass pad will be built on top of gravel layer and will not obstruct drainage flow, therefore, The Development Engineering (DE) Department does not object to variance application A095/21.
